

Date:2018/10/13

Patient's Name: F.SH

Responsible Physician: Dr.Elahi

Patient presentation:

42years, Female, Negative family history

Presented with left breast masses. There were two ill-defined thicknesses in 2 o'clock & 6 o'clock based on physical exam. The aforementioned thicknesses were confirmed by Mammography and Ultrasound as BIRADS 4 masses.

MRI: BIRADS 5 masses in left breast

Question: Plan?

Recommended tests:-Targeted Ultrasound and Re-biopsy

Recommended plan: Based on the new biopsy report
