

Date:2018/10/13

Patient's Name: F.S

Responsible Physician: Dr.Esfandbod

Patient presentation:

33 years, Female

Family History: negative

Simultaneous right breast invasive ductal carcinoma and papillary thyroid carcinoma, underwent total thyroidectomy and lumpectomy and axillary lymph node dissection. 9 out of 11 right cervical lymph nodes were involved by breast cancer. Axillary sentinel node and 2 excised non-sentinel nodes were free.

Question: Plan?

Recommended tests:-PET/CT

Recommended plan: Breast cancer-focused chemotherapy + thyroid suppression with Levothyroxine → radiotherapy for breast cancer → Radioactive Iodine for thyroid cancer
