

**Date:** 3 Aug 2019. 98/5/12.

**Patient's Name:** F.KH.

**Responsible Physician:** Dr. Aghili.

**Patient Presentation:**

- A 36 year old female diagnosed with breast cancer 4 years ago(ER+, PR+, HER2 -, ki67 40%). She underwent BCS followed by adjuvant chemoRT.

-Last year, right adrenal and multiple liver masses were detected in her follow up; Biopsy of liver lesion reported NET.

-Breast pathology was reviewed and reported to be NET.

**Question:** Plan?

**Recommended Plan:** Breast pathology should be reviewed to determine whether it is IDC with neuroendocrine features or NET.
