

Date: 31 Aug 2019. 98/6/9.

Patient's Name: M.N.

Responsible Physician: Dr.Miri.

Patient Presentation:

-A 48 year old female with left breast mass diagnosed with IDC with positive axillary LN, and underwent BCS+ALND.

-Pathology: IDC+DCIS, T=2.5cm, G3, LVI+, one out of nine LNs involved, close medial margin(DCIS<0.5mm).

Question: What should be done about close margin: re-surgery or RT?

Recommended Plan: RT is recommended.
