

**Date:** 18 May 2019 . 98/2/28.

**Patient's Name:** T.H.

**Responsible Physician:** Dr.Shahi.

**Patient Presentation:**

-A 59 year old female with breast cancer underwent MRM 8 months ago. Pathology review reported IDC, T=4cm, no LN involvement(0/13), ER+, PR+, HER2 2+ (FISH: low amplification), Ki50%. She refused to undergo adjuvant treatments.

-Now, she has done a PET scan which shows no metastasis.

**Question:** Regarding patient's condition and 8 months delay, what type of adjuvant treatment is justified: chemotherapy, hormone therapy, or hormone therapy plus Herceptin?

**Recommended Plan:** Administration of aromatase inhibitor plus Herceptin is recommended.
