

Date: 1 June 2019 . 98/3/11.

Patient's Name: KH.E.

Responsible Physician: Dr.Omranipour.

Patient Presentation:

-A 58 year old female with right breast mass with diagnosis of DCIS on CNB, underwent mastectomy and SLNB.

-Pathology examination reported extensive DCIS with at least 2 foci of IDC(5mm and 4mm), G1, LVI+, no LN involvement(0/2), free margins, ER+, PR+, HER-, Ki25%.

Question: Does she need adjuvant chemotherapy, or endocrine therapy alone is enough?

Recommended Plan: No adjuvant chemotherapy is needed; hormone therapy is recommended.
