

Date: 8 June 2019 . 98/3/18.

Patient's Name: P.GH.

Responsible Physician: Dr.Sedighi.

Patient Presentation:

-A 51 year old female - with positive family history of breast cancer in her sister(51 year old) and cousin(32 year old)- had been underwent MRM because of breast cancer 25 years ago.

-Patients can't afford genetic test, and she desires to have prophylactic mastectomy.

Question: According to patient's will, is prophylactic mastectomy is justified?

Recommended Plan: Regarding patient's family history and risks, mastectomy is justified after forensic medicine consultation.
