

**Date:** 22 June 2019 . 98/4/1.

**Patient's Name:** Kh.H

**Responsible Physician:** Dr.Miri.

**Patient Presentation:**

-A 41 year old female presented with metastatic breast cancer(widespread bone mets).

-She has past history of AF, CVA, and valvular heart disease and is candidate for valve replacement surgery.

**Question:** Does her local disease should be treated?

**Recommended Plan:** Local disease can be treated, but not in the same session with cardiac surgery.
