

**Date:** 2020/12/05 ;15 /09/1399

**Patient's Name:** F.M

**Responsible Physician:** Dr.Ahmadi

**Patient presentation:**

- 39years – negative family history
- Presented with left breast spontaneous serous nipple discharge from single duct.
- Mammography: BIRADS 0
- Ultrasound: BIRADS 4a. Intraductal mass( 3o'clock) 8x4mm
- Mass completely removed by VAB (vaccume assisted biopsy)
- Pathology: intraductal papilloma without atypia +FCC
- Reduction mammoplasty (superomedial pedicle) and complete duct excision performed.

**Final pathology report:** Ductal Carcinoma In Situ(DCIS) 4 mm; ER + 100% ;  
PR+ 100% ; Grade 1

**-Question:** Is the next surgery necessary?

**Recommended tests:** Review pathologic report.

**Considered plan:** Return to multidisciplinary after pathology review.
