

Date: 1399.7.12; 3.10.2020

Patient's Name: M.Z

Responsible Physician: Dr. Mirzania

- 50 years
- Patient presentation: Presented with two masses in right breast
- core needle biopsy pathology of both: IDC+ focal DCIS
- ER+90% , PR+10% , Her2+>10%, Ki67 <5%
- Surgical Pathology; right breast: IDC, Bifocal.1.6cm &1.2cm.NO DCIS
- PNI -, LVI -, margin free.
- IHC: ER +80%, PR +30%, HER2-, Ki67 15%,

Question: Considering discordance reports in IHC of CNB biopsy and after surgery, which of them should be considered for treatment?

Recommended Plan: Review pathology of core biopsy
