

Date: 19/7/1399; 10.10.2020

Patient's Name: A.S

Responsible Physician: Dr. Omranipour

Patient presentation:

- 51years , afraid of any form of recurrence in cancer
- Nipple Sparing Mastectomy + Sentinel Lymph Node biopsy(dual technique) is done for her Left. Breast.
- Pathology : ILC (classic type)GII _ 1.5cm_ LCIS. 2%; LVI -;PNI - ; margins free
- ER+80% ; PR+80%; Her2-; Ki67= 7%
- SLN=0/9. Nonsentinel 0/1
- Also patient has asked for contralateral prophylactic mastectomy

Question: Does she need chemotherapy?

Recommended tests: Requesting oncotype is proposed.

Considered plan: With the lack of oncotype performing chemotherapy is necessary unless she accepts the consequences herself.
