Patient's Name: M.M

Responsible Physician: Dr. Omranipour

Patient presentation:

- 53years, positive family history (Bilateral breast cancer in her sister)
- Postmenopausal(since 2 years ago)
- Presented with only one 8 mm right breast mass detected on sonography and resultant pathology of ILC(invasive lobular carcinoma)
- She requested bilateral mastectomy and it was done.
- Right Mastectomy pathology was : LCI+LCIS in 3masses found by sequential diameters of 1.2-1.1-0.7 mm, without any lymphovascular or perineural invasion ; G2; SLN done and the result was (0/1) involved.
- IHC: ER+100% ; PR+100% ; her2 0 ; ki67: 5-10%
- Left Mastectomy pathology : Florid UDH

Question: Her genetic test is negative and she is in postmenopausal status with favorable tumoral features; Can we omit chemotherapy?

Recommended tests: Nothing

Considered response: Yes; Chemotherapy can be hold off.
