

Date: 19 Sep 2020. 99/6/29.

Patient's Name: R. P.

Responsible Physician: Dr. Elahi

Patient Presentation:

- A 67year old female, left breast mass
- Mammography: left UIQ speculated mass, stable since 1394
- Ultra-sonography: Left UIQ, micro lobulated mass, 18 mm (B4b)
- core needle biopsy: foci of DCIS and foci of micro-invasion
- Surgery: BCS+SLNB
- Pathology: small focus of DCIS, free 1 sentinel lymph node and 3 non-sentinel lymph nodes

Question: Does she need radiotherapy?

Recommended Plan: In this patient radiotherapy could be ignored.
