

**Date:** 10.4.2021;1400.1.21

**Patient's Name:** M.F

**Responsible Physician:** Dr.Mousavi

**Patient presentation:** A 43 year- old woman with left breast cancer who underwent BCS+AD and Adjuvant CHT referred for RT.

FH: Negative

Pathology: IDC, T=42 mm, LVI-, DCIS +, triple negative, Ki67 40%, 0/13 LN, involved posterior margin

Recent mammography: a Round left Axillary LN

**Question:**

Is further resection needed?

**Considered plan:**

- 1.Right breast internal Mammary LN in mammography review.
- 2.XRT with larger boost.
