

**Date:** 17.4.2021;1400.1.28

**Patient's Name:** M.K

**Responsible Physician:** Dr.Saberi

**Patient presentation:** A 37 year-old woman with left breast nipple bloody discharge who underwent excisional Bx without margins marking.

MG: Left LIQ microcalcification (B4)

U/S: Left periareolar mass (B4a)

CNB: intraductal papiloma+ADH

Surgical pathology: papillary DCIS, margins: 1mm (only one margin, but unknown) and the others are free.

**Question:**

What is the next plan?

Does she need xRT ?

Are surgery and re excision of margins needed?

**Recommendation:**

1.Pathology review

2 .Reevaluation and Imaging review

3 .Re excisional surgery is recommended before RT.
