

Date: 03.07.2021; 1400.04.12

Patient's Name: KH.A

Responsible Physician: Dr.Miri

Patient presentation:

A 48 year-old woman with past history of right breast cancer and right mastectomy(11years ago) and elevated CA15-3 who desired breast reconstruction
CT: polycystic kidney disease
PET: negative

Question:

What is the next plan?

Recommendation:

- 1.PCKD causes mild CA15-3 elevation and there isn't any metastatic lesion.
2. Surgical reconstruction could be done.
