

Date: 21.08.2021; 1400.05.30

Patient's Name: E.M.N

Responsible Physician: Dr.Esfandbod

Patient presentation:

A 28 year-old pregnant woman (GA 11w) with right breast cancer who underwent mastectomy and SLNB about 2 weeks ago

Pathology: IDC, G2, LVI+, T=1.9cm, SLNB 0/4, ER+ (100%), PR+ (60%), HER2 -, ki67 40%

Question:

What's the next plan?

Recommendation:

- 1.Systemic chemotherapy.
- 2.Oncotype Dx is not recommended because of her age.
