

Date: 11.09.2021; 1400.06.20

Patient's Name: M.Gh

Responsible Physician: Dr.Tougeh

Patient presentation:

A 43 year-old woman with past history of left breast cancer(IDC, triple negative) and BCS and chemoradiotherapy about 12 years ago, then presented with recurrence of left side TNBC, underwent left mastectomy.

Question:

What's the next plan?

Recommendation:

- 1.It could be second primary or recurrent left breast cancer.
- 2.Chemotherapy could be done like 12 years ago.
- 3.Re irradiation should be informed to the patient because it may cause malignancy.
