

**Date:** 18.12.2021; 1400.09.27

**Patient's Name:** S.A

**Responsible Physician:** Dr.Alipour

**Patient presentation:** A 45 year-old lady with multiple masses in right breast  
**CNB right breast 12 & 1 o'clock:** IDC & DCIS grade 1, 2  
**CNB right breast 8 o'clock:** fibroadenoma  
**CNB right breast 9 o'clock:** sclerotic intraductal papilloma  
**MRI:** mass in deep central part of left breast B4a that did not seen in target sonography  
The patient wants left breast mastectomy.

**Question:**

Is NSM possible?

**Recommendation:**

Right breast NSM is possible & left prophylactic mastectomy is recommended.
