

Date: 07.01.2022; 1401/04/11

Patient's Name: Z.Sh

Responsible Physician: Dr.Alipour

Patient presentation: A 42 year-old woman with thickening in LIQ of right breast

Mammography: thickening of areola

Sonography: thickening of skin and areola in LIQ

MRI: findings are in favor of right breast inflammatory cancer with extensive axillary adenopathy

Right axillary CNB: reactive lymph node tissue

Breast biopsy: normal

Question:

What is the treatment plan?

Recommended plan:

1-Sonography guided biopsy is recommended.

2-Axillary sonography
