

**Date:** 08.01.2022; 1400.10.18

**Patient's Name:** B.K

**Responsible Physician:** Dr.Jalaeefar

**Patient presentation:** A 48 year-old lady known case of metastatic breast cancer (skin involved)

**CNB:** IDC, ER negative ,PR negative, HER-2 negative,Ki67 30%

She underwent chemotherapy (8 sessions) & during that the cancer progressed and the skin became ulcerated.

1.5 months ago brain MRI was done & brain metastasis was reported. So she underwent radiotherapy (10 fr)

**Question:**

What's the next plan?

**Recommendation:**

Palliative surgery & if not feasible breast radiotherapy.
