

Date: 14.01.2023; 1401/10/24

Patient's Name: A.M

Responsible Physician: Dr.Elahi

Patient presentation: A 66 year-old woman with right breast cancer. She underwent BCS and SLNB.

Pathology: IDC in UOQ, Tumor size: 22mm, Grade: 1, LVI: negative, Margins: free, SLNB: 0/1, ER: 90%, PR: 90%, HER-2: single positive, Ki67:10%.

Question:

Does she need neoadjuvant chemotherapy?

Recommended plan:

Oncotype diagnose was suggested if it is not possible chemotherapy with 4TC (Taxol; Cyclophosphamide) and AI (Aromatase inhibitor) is recommended.
