

Date: 21.01.2023; 1401/11/1

Patient's Name: A.M

Responsible Physician: Dr.Shahi

Patient presentation: A 55 year-old woman, with no menopause, has history of End-Stage Renal Disease (ESRD). She is candidate for renal transplant; she underwent mastectomy and sentinel lymph node biopsy (SLNB).

Pathology: IDC, Grade: 2, LVI: negative, Tumor size: 2cm, SLNB: negative, luminal A, Ki67: 5%.

Question:

Is adjuvant chemotherapy needed?

Recommended plan:

- 1-She is candidate for adjuvant chemotherapy.
- 2-Renal transplant should be done later.
