

Date: 03.12.2022; 1401/09/12

Patient's Name: Z.Y

Responsible Physician: Dr.Omranipour

Patient presentation: A 47 year-old woman with right breast cancer, she underwent BCS and SLNB.

CNB: IDC, T: 12mm, ER: 85%, PR: 15%, HER-2: 1+ (Negative), Ki67:10%, SLNB: 3 nodes are negative.

Question:

Does she need adjuvant chemotherapy or endocrine therapy alone is enough?

Recommended plan:

1-Oncotype was recommended, if it is not feasible, adjuvant chemotherapy (4 TC) is suggested.
